

April 25, 1970

Dear Michael

I think Sabin will already have contacted you about my hopes of seeing you (and some others) for more interesting discussions than some that may take most of the time during the Board meeting May 1 ff. I hope so, and I am looking forward to seeing you (on the optimistic premise that you will indeed be at hand).

Besides Biology, I wanted to talk to you about the activities of the Association for Peace, from whom I have been receiving some literature of very great interest. I believe you may have some connection with them; and I believe the views they had presented (so far) reflect your line of thinking.

One concrete question -- has the AfP sought or gotten ~~an~~ any press publicity? Would this be desirable or otherwise? If you thought it would be constructive, I had in mind to file a column about it for the Washington Post.

We can of course talk about this at closer reach, but I thought it wise to raise the matter in advance.

Looking forward,
